Do Check (Click) It Out !!!

Reimagined 3D Portfolio Created & Rendered With ReactJS & ThreeJS By Praabindh's Org is an impressive project that showcases the best of 3D art and design. The project was created and rendered by Praabindh's Org using the powerful combination of ReactJS and ThreeJS. The website features an interactive 3D layout that allows visitors to view Praabindh's work from different angles, highlighting the depth and complexity of his 3D art and design.

Reimagined 3D | Home

Tech Stack

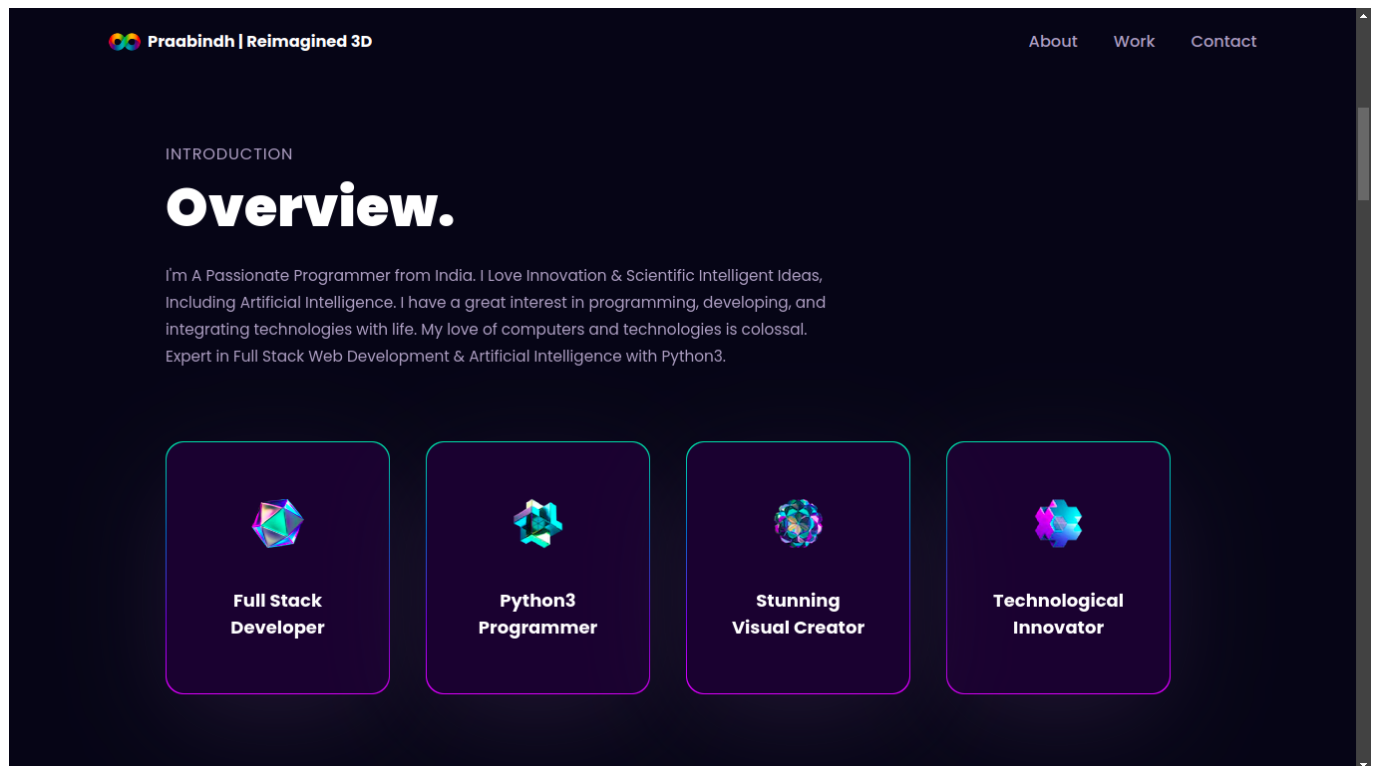

- JavaScript
- ReactJS
- ThreeJS
- ThreeJS Fiber
- ThreeJS Drei
- HTML5
- Tailwind CSS
- Maath
- React Tilt
- React Vertical Timeline Component
- React Router DOM
- Vite
- EmailJS
- Framer Motion

Features

Interactive 3D Layout - The website's three-dimensional layout allows visitors to view Praabindh's work from different angles, showcasing the depth and complexity of his 3D art and design.

Easy Navigation - The website features easy-to-navigate menus that allow visitors to explore Praabindh's work in detail.

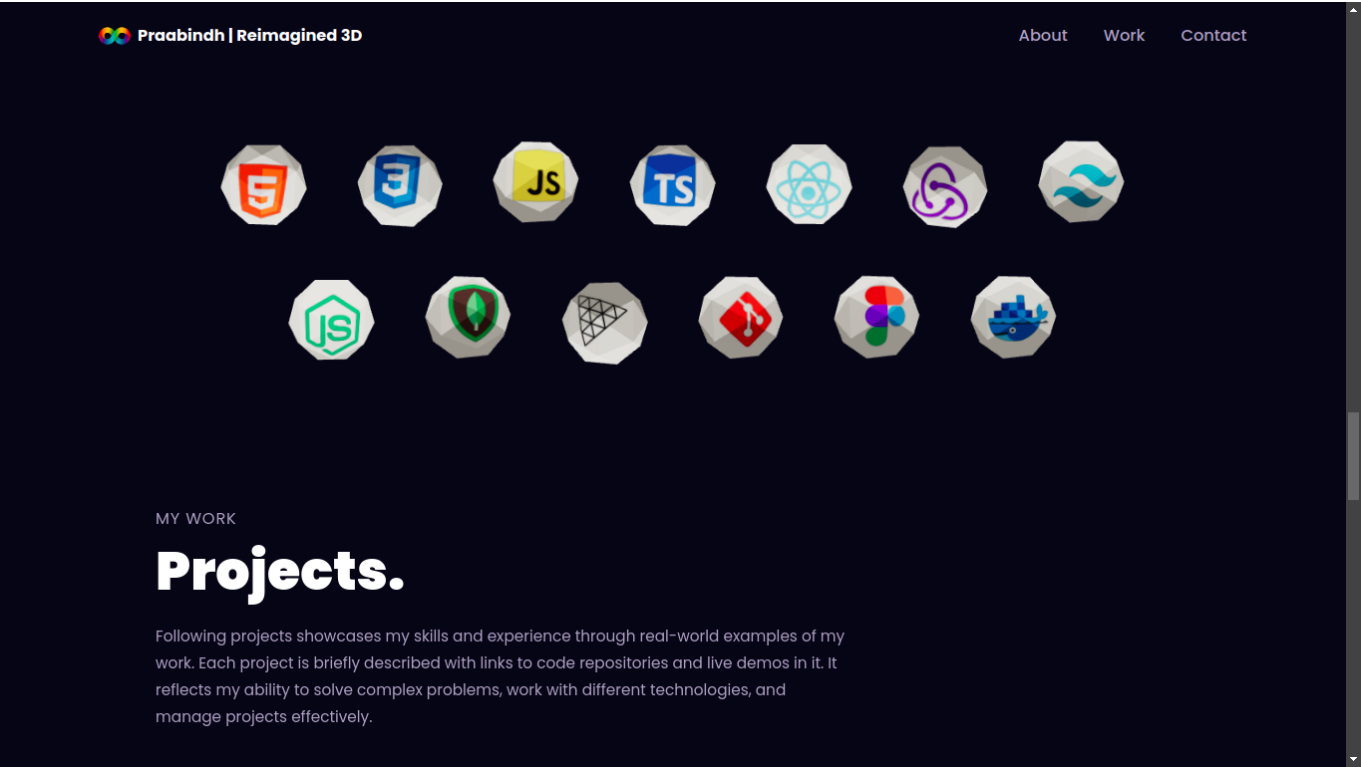

Relmaged 3D | Overview

Responsive design - The website has been designed using a responsive design approach, where the layout and content adapt to different screen sizes and resolutions. This ensures that the website looks and works

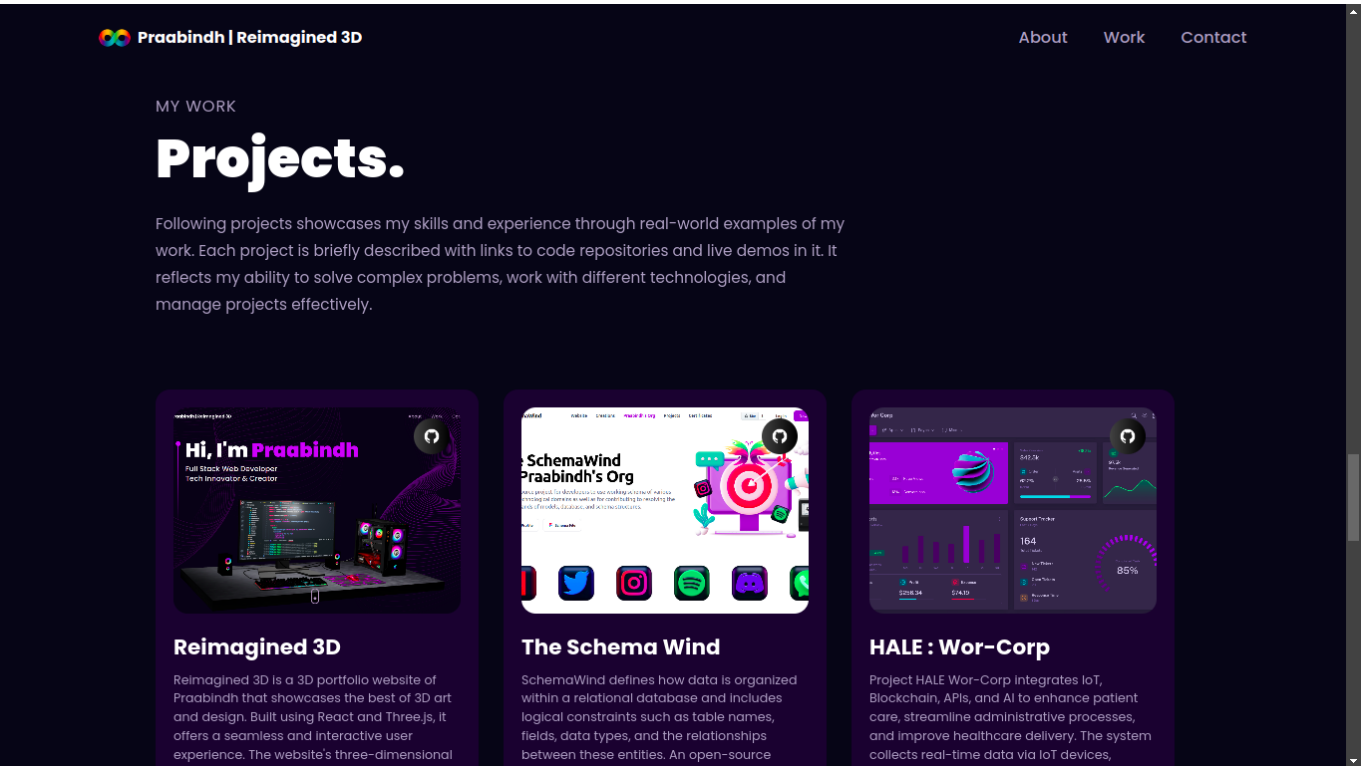

well on devices with varying screen sizes, such as desktops, laptops, tablets, and smartphones.

Reimagined 3D | Tech

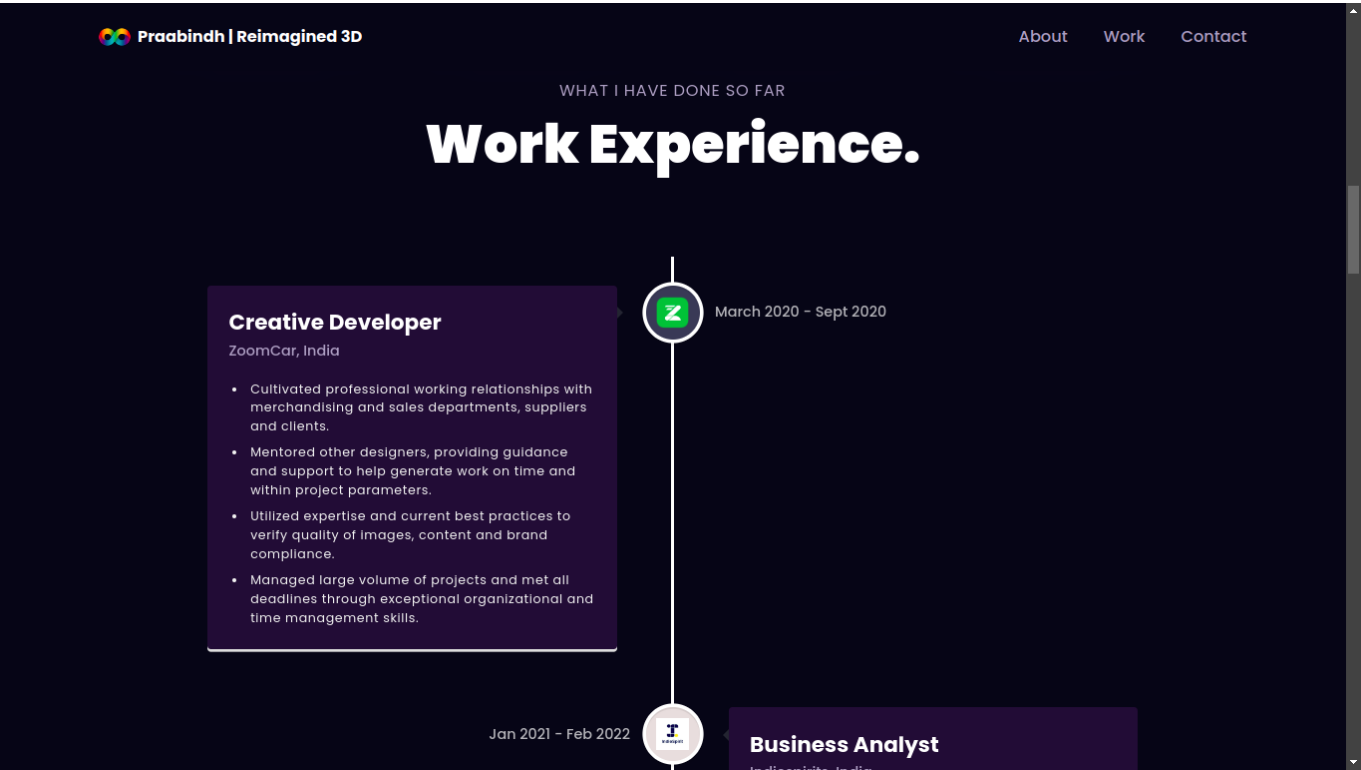

Interactive Components - Interactive components such as React Tilt and Framer Motion are used to enhance the user experience.

Reimagined 3D | Projects

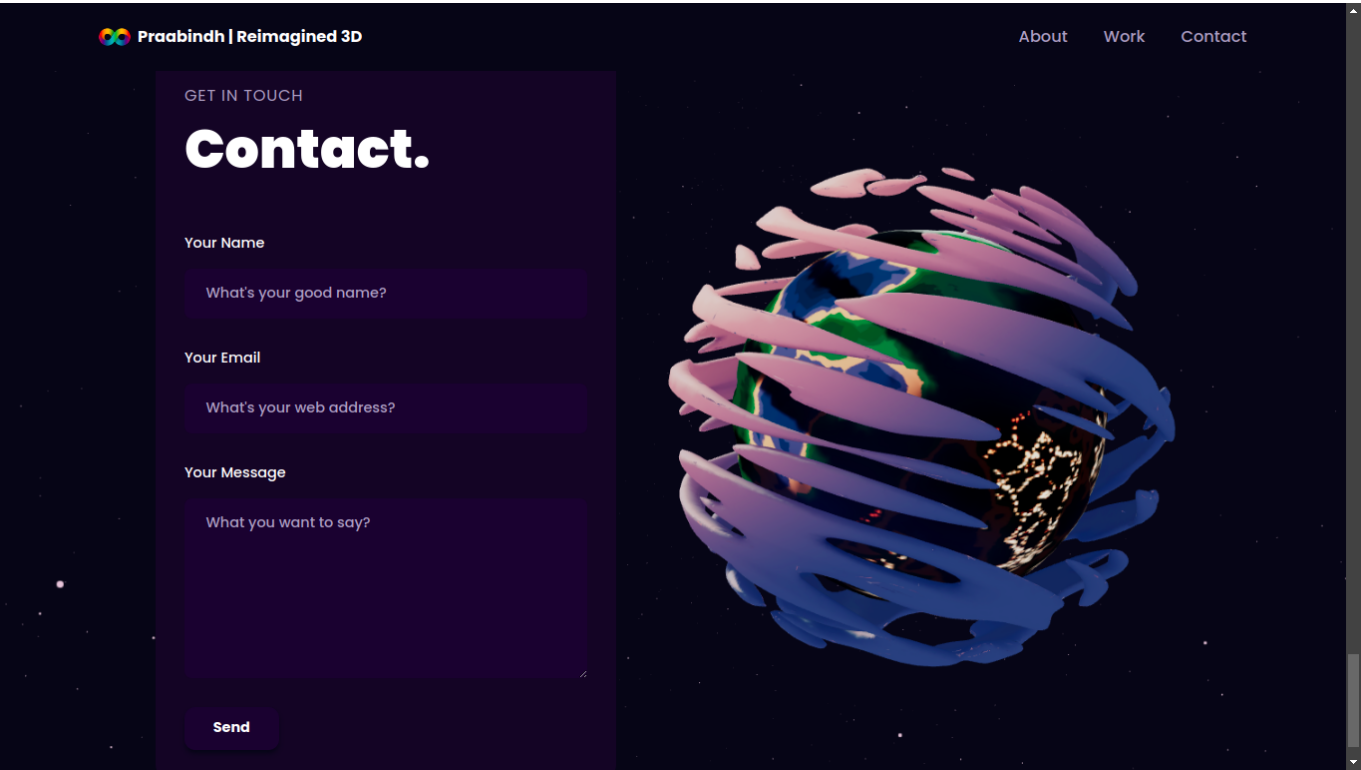

Vertical Timeline Component - The website features a vertical timeline component that showcases Praabindh's work chronologically.

Reimagined 3D | Work

Contact Form - The website includes a contact form powered by EmailJS that visitors can use to get in touch with Praabindh.

Reimagined 3D | Contact

User-friendly navigation - The website's navigation has been optimized for both desktop and mobile devices, with clear and easy-to-use menus, buttons, and links. This makes it easy for users to find what they're looking for, regardless of the device they're using.

Touch-friendly interface - For mobile devices, the website's interface has been optimized for touch input, with larger buttons, clear labels, and intuitive gestures. This ensures that users can interact with the website using their fingers, without the need for a mouse or keyboard.

Fast loading times - The website has been optimized for fast loading times on both desktop and mobile devices, with compressed images, streamlined code, and minimal use of external scripts and plugins. This ensures that users can access the website quickly, even on slower connections or older devices.

Cross-browser compatibility - The website has been tested and optimized to work seamlessly on all major web browsers, including Chrome, Firefox, Safari, and Internet Explorer. This ensures that users can access the website from any device, using their preferred browser.

Built With Technology

React JavaScript

ReactJS is a popular JavaScript library for building user interfaces, and it is widely used in web development. ReactJS is known for its efficiency, modularity, and flexibility. It allows developers to build complex user interfaces with ease, making it an ideal choice for building 3D portfolio websites like Reimagined.

Three JavaScript

ThreeJS, on the other hand, is a JavaScript library that allows developers to create and render 3D graphics in web browsers. It is a powerful and versatile library that is widely used in creating 3D websites, games, and visualizations. ThreeJS is capable of creating complex and interactive 3D environments, and it is a perfect fit for creating the interactive 3D layout of Reimagined.

Libraries & Tools

Praabindh's Org used several other libraries and tools in creating Reimagined, including ThreeJS Fiber, ThreeJS Drei, HTML5, Tailwind CSS, Maath, React Tilt, React Vertical Timeline Component, React Router DOM, Vite, EmailJS, and Framer Motion. Each of these libraries and tools contributed to the development and rendering of the website.

Reimagined features an easy-to-navigate menu that allows visitors to explore Praabindh's work in detail. It also has a vertical timeline component that showcases Praabindh's work chronologically, allowing visitors to see how his skills and techniques have developed over time. The website is fully responsive, meaning it works seamlessly on desktop and mobile devices.

Installation

```
npm create vite@latest ./ -- --template react

npm install -D tailwindcss postcss autoprefixer

npx tailwindcss init -p

npm install --legacy-peer-deps @react-three/fiber @react-three/drei maath
react-tilt react-vertical-timeline-component @emailjs/browser framer-motion
```

```
react-router-dom  
  
npm install --legacy-peer-deps three  
  
npm run dev
```

Usage

To install and run the website, follow these steps:

Clone the repository

```
git clone https://github.com/praabindh/Reimagined-3D
```

Install dependencies

```
npm install --legacy-peer-deps
```

Run the development server

```
npm start / npm run dev
```

Open -> <http://localhost:5173/> In Browser -> To View The Web Application

Conclusion

Reimagined is an excellent example of how the combination of ReactJS and ThreeJS can be used to create a visually stunning and interactive 3D portfolio website. Praabindh's Org has demonstrated excellent skill and creativity in the development and rendering of the website. The website is not only a showcase of Praabindh's work but also a testament to the power and flexibility of ReactJS and ThreeJS.
